MAMBA ROUND CATHODIC
MARKER POST + TEST STATION

APPLICATION

Rounded HDPE marker post with cathodic test station built in. Twist Top or Security Sleeve. Provides high visibility to buried utilities and a direct connection point for cathodic testing or 1-way tracer wire locating. High-grade pigment and UV stabilizing agents provide maximum protection against fading. Alerts excavators to buried pipes/cables and can be customized with utility brand, 811 logo, and Call Before You Dig logo.
