T-Style Anchor

MAMBA™ ROUND LOCATE

The Mamba Round Locate Marker Post is a rounded HDPE marker post with a tracer wire access point built in. This marker post provides high visibility to buried utilities and access to a tracer wire system. The locate switch has 6 terminals (5 tracer wire plus 1 ground). You can locate to or from the marker post with the ability to connect/disconnect ground from the switch. Choose between the industry standard Twist Top or the enhanced Security Sleeve to deter vandalism and better ensure the top is replaced after locating.

FEATURES & BENEFITS

TRACER WIRE ACCESS POINT

- 6 terminals (5 tracer wire, 1 ground)
- Rotating switch opens and closes the ground connection to all tracer wires
- Colored hex nuts for wire identification

MAMBA™ ROUND CATHODIC

The Mamba Round Cathodic Marker Post is a rounded HDPE marker post with a test station built in. This marker post provides high visibility to buried utilities and a direct connection point for cathodic testing or one-way tracer wire locating. Choose between the industry standard Twist Top or the enhanced Security Sleeve to deter vandalism and better ensure the top is replaced after testing.

FEATURES & BENEFITS

TEST STATION

- 11 terminal holes; industry standard pattern
- Fits a 3.5" O.D. post
- Can double as a 1-way line locator access point

MAMBA™ TRIAD

The Mamba Triad Marker Post is a three-sided, durable, HDPE marker post for high visibility to buried utilities. The industry-best, single wrap decal provides maximum 360-degrees of visibility and no peeling.

FEATURES & BENEFITS

DECAL

- 360-degree visibility
- Full wrap, 3-sided decal printed on premium cast vinyl with extra-strong adhesive
- Customize with utility's colors, message, logo

POST

- 3-sided for high visibility
- Larger size for maximum visibility and ability to retrofit over other triangular posts
- Impact resistant
- Attached anchor clip provides stability
- Recyclable material
- UV stabilizing pigments to limit fading
- Designed to easily attach to a U-Channel Support Post with a simple drive rivet
- Multiple color options for post (black cap)

MAMBA™ FLAT

The Mamba Flat Marker Post is a two-sided, flexible fiberglass marker that provides high visibility to buried utilities. Recessed design on both sides protects the vinyl decal from damage during installation. Premium cast vinyl film with extra-strong adhesive. The Mamba Flat Marker Post is durable enough to drive into the ground, but still rebounds back after impact. Installs easily using the optional Mamba Marker Driver.

FEATURES & BENEFITS

DECAL

- Customizable
- Premium cast vinyl film with extra-strong adhesive
- Protective overlay applied to marker before shipping
- Meets federal requirements

POST

- 2-sided for high visibility
- Recessed on both sides provides best protection of decal
- Flexible – rebounds after impact
- Durable
- Rust-proof
- Maximum visibility
- High grade color pigments & UV inhibitors keep colors bright
- Color throughout marker – never needs painting
- Multiple color options

MAMBA™ ROUND & TRIAD U-CHANNEL SUPPORT POST

The U-Channel Support Post supports the Mamba Round or Mamba Triad marker posts and provides extra stability. Drive the support post into the ground and slip the Round or Triad over the top.

2 lb/ft

1.12 lb/ft

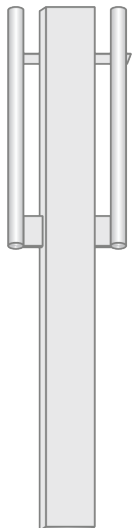

FEATURES & BENEFITS

- Various lengths and weights available
- Galvanized, green painted, or yellow/orange powder coated options
- Steel construction for extra strength
- Highly resistant to wear and tear
- Long life

MAMBA™ FLAT MARKER DRIVER

Installation tool for driving flat fiberglass markers into the ground. Makes installation quick and easy.

FEATURES & BENEFITS

- Superior construction
- Manufactured steel for extra strength
- Quality powder coated finish for durability
- Highly resistant to wear and tear
- Long life
