Electrical & General Purpose Tape

PARTNER WITH NSI BUILDING TECHNOLOGY.

NSI has been helping contractors get tough jobs done since 1975. With professionally-preferred products at competitive prices and service you can count on in the field, we're the partner you need to be successful.

WHY NSI?

Industry Leading Brands & Product Lines.

NSI features several of the industry's top low-voltage infrastructure and installation brands, including LYNN and Platinum Tools. We turnkey cabling, cable management, connectivity and the tools, testers and consumables required for installation.

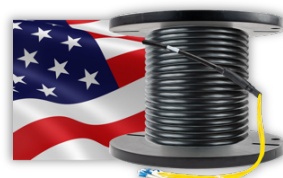

Innovative Products & Technology.

NSI continues to transform the installation experience through future-forward technology and labor-saving products, including our patented Platinum Tools ezEX-RJ45® pass-through connectors and MOFO™ fiber-based HDMI and USB cables.

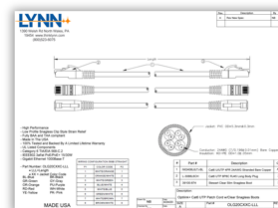

US-Based Quick Turn Manufacturing.

NSI's LYNN operation is one of the largest cable assembly manufacturers with facilities on the East and West coasts. We specialize in quick turn, custom pre-terminated copper and fiber optic cables built with a Quality Assurance and Limited Lifetime Warranty.

In-House Engineering & Project Kitting.

NSI employs dedicated customer experience and solutions architects to ensure your design addresses current and future technology trends. Whether your next installation requires LYNN, Platinum Tools or one of our other industry-leading product lines, the NSI team will help with engineering and ensure everything ships kitted and ready for deployment.

Unparalleled Quality.

LYNN is a premier member of the Corning® CAH ConnectionsSM Gold Program, ensuring product is manufactured, tested and independently audited to the highest standards.

National & Local Distribution.

NSI brands and product lines are available from over 1,200 distribution points across the United States. We leverage partnerships with the leading National and Regional distributors across all major low-voltage industries.
